Pitchayakorn Saigate
Programmer

29 October 2002 / Age: 21 years old / Gender: Male

//

Expertise

I have a strong interest in both Full Stack Development and DevOps.
Proficient and skilled in software and coding. Capable of studying and understanding code quickly, and eager to learn other programming languages.

Skills and Abilities

- Patience and discipline in working with others
- Ability to learn new languages quickly
- Proficient in visualizing problems as flowcharts and translating them into code
- Able to understand and debug code effectively
- Intermediate proficiency in English communication

Activities Participated In

- Top Gun Rally 2023
  17 - 25 November 2023
     Served as the developer responsible for handling the server too receive and forward data using MQTT, Docker, and Streamlit.
- SIT Open House 2023 "IT มีดี We Share" 2023
     Assisted in coding for an intelligent fish tank system that pumps old water to irrigate plants, adds fresh water to the fish tank, and allows the control of water or light motors through an application.
- Let's Celebrate 53rd SPU Tech Fest 2023
     Assisted in coding and wiring Arduino for a smart plant pot project. The vertical plant pot features a motor that pumps water to the plants at the top and drains it from the bottom, along with a motor that rotates a light around the pot to ensure the plants receive consistent illumination.

Education

Bachelor's Degree
Currently Studying
Major in Computer Engineering
Faculty of Information Technology
Sripatum University

Programming Skills

C	HTML
C++	CSS
Python	Docker
SCSS	MySQL
Arduino	Python
JavaScript
