ABOUT ME

Computer Engineering graduate with hands-on experience in backend development using Go (Golang). Skilled in designing and building RESTful APIs and working with relational databases. Experienced in contributing to enterprise-scale systems and continuously applying problem-solving skills to real-world challenges. Eager to expand skills in DevOps practices, containerization, and modern deployment workflows.

EDUCATION

Sripatum University 2021 - 2025
Bachelor of Computer Engineering,
Faculty of Information Technology

Expected Salary :30,000 – 35,000 (negotiable)
Availability : 1 month after signing the employment contract
Military Status : Exempted from military service

WORK EXPERIENCE

Humanica Co, Ltd | Nov 2025 - Present

Associate Software Developer

- Developed and maintained backend services using Go (Golang) for enterprise HR systems
- Designed and implemented RESTful APIs to support business workflows and data operations
- Built data aggregation and transformation logic across multiple services
- Optimized system performance using Redis caching to reduce database load
- Implemented complex business logic for large-scale data processing
- Wrote efficient SQL queries and handled relational data using SQL Server
- Collaborated with frontend, QA, and SA to refine requirements, validate business logic, and ensure end-to-end system reliability
- Worked in Agile environment using GitLab and Jira

Transcode Co, Ltd | Jan 2025 - April 2025

Research and Development Intern

- Designed and developed a Device Monitoring System for tracking devices
- Built a matching engine to compare incoming device data with entries in the database to determine status
- Integrated MQTT protocol to receive real-time data from IoT devices and process them with server-side logic
- Created a web interface for displaying device status, using NestJS, NextJS

TECHNICAL SKILLS

- Programming Languages: Golang, Python, C/C++, Typescript
- Frameworks: Go Fiber, Gin, NextJS, NestJS
- Database: SQL Server, PostgreSQL, MongoDB
- Tools & Technologies: Docker, Git/GitLab, Linux (Ubuntu), JWT Authentication, RESTful API
- Other Skills: Bash(basic), Postman, VS Code, Redis

SOFT SKILLS

- Strong problem-solving and analytical thinking
- Effective communication with cross-functional teams (Frontend, QA, SA)
- Collaborative mindset in Agile environments
- Adaptability to new technologies
- Attention to detail in backend development
