Education

Bachelor's Degree

Major in Computer Engineering

Faculty of Information Technology

Sripatum University

Programming Skills

C

TypeScript

C++

JavaScript

Python

Python

Golang

Tools

Docker

Bash(Basic)

Linux(Ubuntu)

Git (Basic)

R&D Intern - Transcode Co., Ltd

January 2025 - April 2025

- Designed and developed a Device Monitoring System for tracking devices
- Built a matching engine to compare incoming device data with entries in the database to determine status
- Integrated MQTT protocol to receive real-time data from IoT devices and process them with server-side logic
- Created a web interface for displaying device status, using NestJS, NextJS

Activities Participated In

Server Developer - Top Gun Rally 2023

17 - 25 November 202

- Designed and implemented server infrastructure to receive and forward data using MQTT and Docker
- Integrated with Streamlit for real-time data visualization
- Supported communication between AIoT devices and simulation software
